Lewis^Y-Tetrasaccharide-HSA

(Le^Y-HSA)

Fuc α 1-2Gal β 1-4GlcNAc β 1-O-APE-HSA

3

Fuc α 1

The oligosaccharide is linked to HSA lysine residues via a spacer using the isothiocyanate coupling method. The spacer used is *p*-aminophenylethyl (APE). The spacer is glycosidically linked to the reducing monosaccharide unit of the oligosaccharide.

The conjugate normally contain 10-20 moles oligosaccharide per mole HSA.

The conjugate is supplied as freeze dried powder. Storage: -18° C.
